

## GRUNDTVIG PARTNERSHIP PROJECT EMPOWERING MARGINALIZED EI

# The current situation for elders and the perspectives in this domain can be improved

#### Evolution projected aging indicators, 2010-2050 (%)

Age	2007	2010	2020	2030	2040	2050	2060
0-14	15.3	15.1	14.7	13.0	11.8	11.8	11.5
15-64	69.9	70.0	67.9	66.8	62.6	57.3	53.6
65+	14.9	14.9	17.4	20.3	25.5	30.9	35.0
<i>80</i> +	2.7	3.0	4.2	4.97	4.94	13.1	15.9

#### Major needs:

- older people are not aware of their rights;
- hierarchical bottlenecks existing within public institutions
- limited access for old people to information
- · old people feel the need to spend their free time in a pleasant way
- the need for providing services according to individual needs rather than pension
- elder abuse phenomenon has gained momentum over the past 10 years, that must be protected
- health insurance are not made for old people and banks never give loan to someone with the age passed 65, this is a discriminating behavior
- There are personal assistants to help with local funding from support individually
- poor financial situation of the elderly protection, health care, gaps in health insurance system

### Causes of long-term institutionalization:

- · loneliness and lack of network support
- unwillingness to show the elderly
- lack of income

- different chronic conditions
- physical or mental disabilities;;
- Homelessness;
- Lack of adaptation in the home care services;
- "seizure" within the family of origin;
- immobilization in bed;
- domestic violence or those who have committed to look after them.

### Approach of elderly and their needs

- include family in helping old persons
- the need of training of personal assistants
- involvement of the beneficiaries the human and financial resources in the execution of the individual intervention
- mixing system administration procedures related to local administration local autonom
- · organizing information campaigns on the rights of the elderly
- communicating new information
- standardization of field services
- integrated approach to socio-medical
- participation in community
- involving older people in community life
- the right to participate in social life
- A healthier attitude towards own aging.
- State support is needed to become more open on the aging topic.
